

What we have accomplished with your help!

Our office at 1826 Henderson Street in Columbia is a registered historic building and our object is to preserve it with wonderful support from the local historic association and Richland Co. for monetary grants. With this support we have been able to do the following:

- Update the electrical and gas inputs into the house;
- Repair the stantions under the house;
- Remove all the rotten wood, decking, steps, and non-wood siding;
- Replace all of the above;
- Scrape and power wash the house;
- Prime all the new wood;
- Install new cross ventilation vents in the attic area; and
- Paint the outside of the house in period appropriate color.

Still working!

Pennies for PTA

Where we still need your support!!

- Replace the roof,
- Add foundation vents,
- Repair exterior doors and repair locks where needed,
- Repair the cement sidewalk entrance to the house,
- Replace components of the heating/air conditioning system,
- Increase exterminator's contract to include protection in crawl spaces, and
- Landscaping with period design and garden.
